Introduction

This document contains the release notes for LOGIGTIC Spectrum version 1.0.0. The following sections describe the release in detail and provide late-breaking or other information that supplements the main documentation.

This is a first release for logistics operations usage. Your feedback is important to us; please help us make this the best product possible. Keep in mind that we are continuing to work on this product and things may change in the future.

What's LOGISTIC Spectrum?

- New Logistic / Shipping Management software contributed by Nainar & Team.
- Many quality features are available on this software product. See "Features" below for details.

Installation and Upgrade Notes

Installation

1. LOGISTIC Spectrum is a program which needs MS SQL for installation of the Setup file provided by us or downloaded from our website.

2. Just unzip the archive (downloaded file) to a location of your choice in our system.
3. The MS SQL Support is as follows
 - Without Network support***
 - a. Windows XP
 - b. MS SQL Personal Edition 2000 or Desktop Edition 2000 or Enterprises Edition Client 2000
 - With Network Support***
 - a. Windows 2003/2008
 - b. Ms SQL Enterprises Edition Server 2000
 - c. Ms SQL 2005/2008
4. Create a New MS SQL database (Ex. logisticsBase) and import tables to it from logisticsBase.sql file provided in the file you have downloaded.
5. Click "Setup.exe" from file you have extracted to a folder which will setup your application automatically.
6. Choose your server & database for first time only on running the application.
7. Run the logistics application from your program location.
