

Shipping Management Solutions

Shipping Management Solutions

INTRODUCTION

LOGISTIC Spectrum allows you to manage and access all your shipping activities and supply chain from one location.

It is designed to cater for large shipper & small shippers.

Great care has been taken to keep the industry standards in view and at the same time to scale to the new industry standards that can be adopted in the future.

The software has been designed and developed keeping in mind that the shippers whether large or small can use it for their needs and customize if they have any specific functionality that is required by their operations.

Customization can be done by us after doing so a detailed requirement analysis.

Logistic Spectrum can be accessed from multiple locations or branches and operated by multiple users from any locations by providing a public IP (Internet Protocol) to the Local SQL Server that hosts & stores the data's at one location.
